EOC INTERACTION PRACTICE

Interaction 1 | Multiselect

U1-L01 | Supports MA.912.AR.2.1
Student | 30-45 minutes

Select every statement supported by the mathematics. More than one response is correct.

1 SELECT | 2 HIGHLIGHT | 3 MATCH | 4 ENTER | 5 EDIT | 6 CONNECT

ITEM 01 | BUILD THE COMPLETE EVIDENCE SET

REM PRACTICE
Six response structures.
One clear evidence trail.

MULTISELECT

Solving One-Step Equations

Solve $x + 7 = 19$.

- ☐ A. The result is $x = 12$.
- ☐ B. A productive strategy is to identify the operation on the variable and use its inverse on both sides.
- ☐ C. The result is $x = 26$.
- ☐ D. A complete response should substitute the solution into the original equation and confirm both sides are equal.
- ☐ E. The original conditions can be ignored after a choice is marked.

SOLVE OR ANALYZE | 1 POINT

Required mathematics	Verification
Show the key steps or feature evidence.	Use the original equation, representation, or conditions.

ELIMINATE ONE DISTRACTOR | 1 POINT

Distractor analysis
Choice ___ is false because:

Interaction 2 | Selectable Hot Text

Shade every numbered reasoning segment that is mathematically true.

1 SELECT | **2 HIGHLIGHT** | 3 MATCH | 4 ENTER | 5 EDIT | 6 CONNECT

ITEM 02 | READ THE TASK BEFORE THE REASONING

HIGHLIGHT
Shade only reasoning segments that are mathematically true.

SELECTABLE HOT TEXT

Solving One-Step Equations

Solve $-4y = 28$.

Use the original information to decide which segments belong in a correct response.

SELECTABLE REASONING SEGMENTS

Shade every segment that can belong in a complete solution or analysis.

1. A productive strategy is to identify the operation on the variable and use its inverse on both sides.
2. The result is $y = 7$.
3. The result is $y = -7$.
4. The response should substitute the solution into the original equation and confirm both sides are equal.
5. Once an answer is chosen, no evidence from the original task is needed.

BUILD THE REASONING CHAIN | 2 POINTS

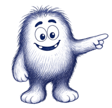
1 | First move	2 | Result	3 | Evidence
I will:	My result is:	This is supported because:

Interaction 3 | Matching Matrix

Match each prompt to exactly one correct result, then support one row.

1 SELECT | 2 HIGHLIGHT | 3 MATCH | 4 ENTER | 5 EDIT | 6 CONNECT

ITEM 03 | MATCH PROMPT TO RESULT



MATCH
Mark one action in each row, then solve and verify.

Row	Equation	A $x = 12$	B $y = -7$	C $z = -18$
1	Solve $x + 7 = 19$.	☐	☐	☐
2	Solve $-4y = 28$.	☐	☐	☐
3	Solve $z/6 = -3$.	☐	☐	☐

RECORD THE EVIDENCE FOR EACH MATCHED ROW

ROW	MATCH	KEY WORK OR FEATURE	CHECK
1			
2			
3			

MATCH RATIONALE

Choose one row

Row ___ matches ___ because:

EOC INTERACTION PRACTICE

Interaction 4 | Equation Editor

U1-L01 | Supports MA.912.AR.2.1
Student | 30-45 minutes

Enter a complete mathematical response, then show the evidence behind it.

1 SELECT | 2 HIGHLIGHT | 3 MATCH | **4 ENTER** | 5 EDIT | 6 CONNECT

ITEM 04 | CREATE THE RESPONSE

ENTER
Define the variable, write the equation, solve, and check.

EQUATION EDITOR

Solving One-Step Equations

Solve z/6 = −3.

Your entry may include an equation, inequality, ordered pair, expression, value, or classification.

FOUR-PART RESPONSE | 3 POINTS

1 | Given information	**2 | Equation editor entry**
Record the quantities or features you used.	Enter your complete response.
3 | Supporting work	**4 | Meaning**
Show the decisive step, computation, or classification evidence.	Interpret the response in the language of the task.

VERIFICATION

Return to the original
Substitute the solution into the original equation and confirm both sides are equal.

EOC INTERACTION PRACTICE

Interaction 5 | Edit Task Inline Choice

U1-L01 | Supports MA.912.AR.2.1
Student | 30-45 minutes

Choose the one replacement that repairs the student's selected line.

1 SELECT | 2 HIGHLIGHT | 3 MATCH | 4 ENTER | 5 EDIT | 6 CONNECT

ITEM 05 | REPAIR THE FIRST INCORRECT ENTRY

EDIT
Replace the first incorrect line before finishing the solution.

EDIT TASK INLINE CHOICE

Jordan's response

For the task 'Solve −4y = 28.', Jordan records 'y = 7'. Which replacement makes the response correct?

- ◯ A. y = −7
- ◯ B. y = 7
- ◯ C. No change is needed.
- ◯ D. Remove the original information and estimate.

COMPLETE THE REPAIR | 2 POINTS

Corrected work	**Verification**
Copy the replacement and show the decisive evidence.	Check the replacement against the original task.

WHY THE EDIT IS NECESSARY

Error analysis

The original response fails because it does not substitute the solution into the original equation and confirm both sides are equal.

EOC INTERACTION PRACTICE

Interaction 6 | Multi-Interaction Item

U1-L01 | Supports MA.912.AR.2.1
Student | 30-45 minutes

Complete every response part; later parts depend on the evidence you build first.

1 SELECT · 2 HIGHLIGHT · 3 MATCH · 4 ENTER · 5 EDIT · 6 CONNECT

ITEM 06A | SINGLE SELECT THE BEST APPROACH

CONNECT
Complete every part, then explain what preserves equality.

PART A | SINGLE SELECT

Solving One-Step Equations

Solve x + 7 = 19.

- ○ A. Identify the operation on the variable and use its inverse on both sides.
- ○ B. Copy the first visible number and stop.
- ○ C. Ignore signs, boundaries, labels, and units.
- ○ D. Choose a response before reading the whole task.

ITEM 06B | EQUATION EDITOR

Key work	Final entry
Show the step or feature that determines the response.	Enter the complete result.

ITEM 06C | MULTISELECT VERIFICATION

SELECT ALL TRUE

Select every statement that completes the evidence chain

Use your work from Parts A-B.

- ☐ A. Substitute the solution into the original equation and confirm both sides are equal.
- ☐ B. The final result is x = 12.
- ☐ C. The final result is x = 26.
- ☐ D. A complete explanation connects the method to the original information.

REM REASONING | 2 POINTS

Mathematical explanation	Format reflection
Why does your method produce a valid response?	Which response structure made your evidence easiest to organize, and why?
